All data come from the Quacquarelli Symonds World University Rankings website (<http://qs.com>). Universities complete an annual survey for QSWUR from which QS receives approximately 40,000 responses. For some institutions, QS uses third party sources or university open source information. QS utilizes key pillars to rank universities which include research, teaching, employability, and internationalization. The methodology includes distinctive indicators: Academic reputation, employer reputation, faculty to student ratio, the number of citations per faculty, international faculty, and international students. Also, QS uses trend data on ranking positions, raw data used behind the ratings, and a variety of other metrics. This ranking is created by Quacquarelli Symonds Ltd., located in London, United Kingdom.
